

# MLH LITE LED SPOTLIGHTS

The difference is clear: more light, more style.

The approved MLH LITE spotlights optimize visibility by creating a precise and powerful light beam – helping you ride safely and be seen in any situation.

## LED SPOTLIGHTS

# MLH LITE

**MLH LITE** is the ideal companion for those who see motorcycling as freedom, movement, and adventure. Perfect for daily commuting as well as demanding rides, it lights your path even when the route gets tough. Solid, versatile, intuitive: a true ally on two wheels.

**More visibility. More control. More freedom.**

MLH LITE is the supplementary LED spotlight by Midland, combining design, safety, comfort and practicality. The body is made of **robust aluminum** with an **optical glass lens**, designed to deliver maximum brightness and long-lasting durability.

Its surface features **a special protective coating** that makes it more resistant to impacts, weather, and daily wear. Certified IP68, it offers total protection against dust and water immersion. Its structure also ensures **efficient heat dissipation**, maintaining consistently reliable performance.

A compact and dependable spotlight for riders who want a complete, safe, and distinctive motorcycle.

## Key Points

- **Versatile dual-tone light** – White long-range high beam and yellow short-range fog light, plus mixed mode for total visibility.
- **Fast and practical wireless control** – Switch modes using the handlebar wireless remote, even while riding.
- **Easy universal installation** – Compatible with bars **Ø10 to Ø32 mm** with no modification needed.
- **Low-consumption LED technology** – Ideal even for small-engine bikes without overloading the battery.
- **Protected against everything** – IP68, resistant to water, dust, and impacts. Built to last even in the worst conditions.
- **Road-legal approval** – Compliant with standards for safe and legal street use.

## LED SPOTLIGHTS

# MLH LITE

**More modes, more control, more safety**

MLH LITE offers three lighting modes – **white high beam (6500 K)**, **yellow fog light (2800–3200 K)** and **mixed light** – allowing you to face any scenario: dark roads, heavy rain, fog, or off-road trails.

Everything is under control with the **wireless remote**, easy to operate even with gloves.

When connected to the horn, it also enables the **automatic strobe function**, ideal for quick signaling or emergency situations. The system operates on **12–15 V DC**. For electric motorcycles, simply add a **DC12–15 V ≥ 10A converter** for optimal performance.

The low-consumption LED technology makes it perfect for small-engine bikes too: **more light, fewer worries**.

Installation is simple and universal: the included adjustable brackets fit bars from **Ø10 to Ø32 mm**. The kit includes everything needed for setup, enabling you to upgrade your bike in minutes.

Approved for road use, it complies with current regulations so you can ride safely anywhere.

## Technical Features

- Light source: **High-brightness LED, 6000 lm per mode**
- Color temperature: **White 6500 K / Yellow 2800–3200 K**
- Modes: **High beam, Fog light, Mixed, Strobe**
- Power: **50W (25W x 2)**
- Operating voltage: **DC 12–15 V**
- High-beam range: **> 380 m**
- Protection: **IP68** (dustproof, waterproof, shock-resistant up to 1 m)
- LED lifespan: **50,000 h**
- Dimensions: **63 × 39 × 39 mm**
- Weight: **130 g (±5 g)**
- Mounting: Universal brackets for Ø10–20 mm and Ø22–32 mm bars
- Remote battery: **CR2032**
